Table 1. Order of Assembly for Videos

Step	Description
Conduct survey	<ul style="list-style-type: none"> Team surveys the Rohingya community and service providers to identify health topics they see as most important, relevant, and challenging (completed June 8th, 2019).
Identify credible source	<ul style="list-style-type: none"> Find preexisting information on the topic from a credible source (eg, Mayo Clinic, Centers for Disease Control and Prevention, National Institutes of Health).
Develop script	<ul style="list-style-type: none"> Under faculty supervision, students will use information from a credible source to develop a 3- to 4-minute script (1-2 paragraphs). The script should be as simple as possible (5th-grade reading level or below). Larger topics should be broken into a series of scripts and videos. Videos can feature different formats, such as someone talking or doing a demonstration or having scenarios with actors and questions.
Have scripts reviewed by professionals	<ul style="list-style-type: none"> Obtain review from a pharmacist and another practitioner. These reviewers' names will be listed at the end of the video as "Reviewed by..."
Translate and produce	<ul style="list-style-type: none"> Translate the scripts with help from Rohingya community members while continuing filming. One video is expected to be completed every 2 weeks. Audio and visual will be kept separate for future editing.
Share and disseminate	<ul style="list-style-type: none"> Upload video to YouTube. The video file (not the YouTube link) will also be shared in a Rohingya community WhatsApp group. Once enough videos are produced, distribute flyers with the link to clinics, Milwaukee Area Refugee Consortium, and resettlement agencies.

Table 2. Topics**Top priority topics**

1. Dental care
 - a. Smoking
 - b. Tobacco use
 - c. Betel nut
2. Family Planning
3. Safe use of over-the-counter medications (eg, by communicating with clinician)
4. Arthritis
5. Cholesterol
6. Hypertension
7. Diabetes
 - a. Medications
 - b. Self-monitoring
 - c. Checkups for eyes, kidneys
8. Using a translator
9. Obesity and nutrition
10. Musculoskeletal issues and how to treat
11. Medication management
12. Dental care, especially in children

Deeper topics to address later

1. Health insurance
2. US health care system
3. Child development, milestones, nutrition
4. Trauma and abuse
5. Mental health
6. Maternity care
7. Eldercare
